WaveFly Total Care

*“The Comprehensive Technology Solution
for Healthcare Institutions”*

Our Services

Our services are positioned to provide the support and infrastructure required by major healthcare providers. The safety of the patient and their data is our utmost importance when transmitting data and storing backups.

Platform as a Service

Take advantage of our platform containing hardware, software, and infrastructure for developing and managing applications

Infrastructure as a Service

We provide consumers with essential computer, network, and storage resources to scale and shrink resources as needed

Software as a Service

Access cloud-based applications through the web or an API and leverage cognitive analytics to stay ahead of your competition

What is Total Care?

WaveFly Total Care puts our clients back in the position to focus solely on critical business decisions. We take care of the technical piece so executive teams can focus on revenue and profits. Companies will quickly understand their services with a standardized monthly budget that covers their technology needs.

Synergistic Relationship

We do not replace your IT team(s); we complement them by providing the advanced technology that allows the IT team(s) or provider to be a rock star and focus on their areas of expertise. Our team will certify them on our way of doing business, taking care of clients, ethics, and values on systems, architectures, and proper design. A breakdown of responsibilities is below.

WaveFly

- Advanced Networking
- Virtualization
- SD-WAN
- Cloud

Existing IT

- End-User Management
- Desktop Support and Troubleshooting
- Support Business Applications
