

# REMOTE WORK Initiative

## GIGABIT BANDWIDTH

10Gb+ of internet access to withstand demanding network loads and eliminate the potential for bottlenecks

## CLOUD & VIRTUAL SERVICES

Fully redundant N+2 cloud and Virtual environment across multiple data centers with connectivity in over 500 data centers

## SECURE ENDPOINT

Secure each user with SentinelOne Endpoint Protection and Forticlient SSL VPN installed on every device

## SCALABLE AND FLEXIBLE

Initial support for up to 10 users with the ability to scale and meet the resource demands required for thousands of remote users

## DIFFICULTY OF REMOTE WORK

Remote work has slowly turned from a novel idea to reality over the last three to five years. In doing so, companies have attempted to put the proper systems and features in place to accommodate the need for remote work at a scale that is capable of meeting the demands of an internal, corporate network. The majority of companies implement break-fix solutions inside of existing network closets that fail to accommodate the extensive processing power required for the encryption utilized by a Secure Socket Layer (SSL) VPN.

## BASIC PACKAGE

Pricing starts at \$1350/month for 10 users. We are currently waiving setup and installation fees.

- ◆ No capital expense or upfront cost all billed through a simple, easy to understand invoice
- ◆ VoIP softphone provisioned for each user
- ◆ All data is stored and backed up in our cloud and accessible from anywhere
- ◆ All users are fast, reliable, always connected, and fully protected end-to-end
- ◆ All connectivity runs through virtual servers sitting behind the virtual Fortigate firewall
